Subject: Proposed Local Improvement-P.I.D.#654640
Date: Monday, February 18, 2019 1:16:43 PM

I am hereby submitting my objections to this Local Improvement.

Even though my fence, all my plants and baby barn on the north side of Devere are encroaching I feel that because the fence line etc. have been there for almost as long as the house has been that they should be exempt and grandfathered in. This will be a huge expense for me as a single person and also to the other home owners of the properties affected here who by the way are retired, elderly or young people just starting their families who could use this money the Town expects us to pay for other things.

The reason for having fences and bushes and trees would be to have some privacy and safety from people, traffic and also noise from living so close to the Middle School.

To put a sidewalk on the North side would infringe on my having a quieter more beautiful and environmentally friendly (Trees and Plants) area to live. The sidewalk would also be redundant as there is a sidewalk on the south side already which the Town will be making into a multi-purpose sidewalk which I think will be nice. I don't believe that our street was ever meant to be used in such a manner with people and traffic so close to our homes.

I am not sure that a curb is necessary either, again at our, the home owners expense. Why can we not have the sewers, catch basins & road upgrades and fixed properly and the road graded as such so we don't need a curb.

Thank you for consideration of my objections.

Regards
Sandra Welner
