---

To Whom it may concern,

I am opposed to the charges being set forth by the town of Riverview for upgrades to Orin Dr. the street only has two houses on it and is not even serviced to the end by street cleaning the damage to the pavement and the drainage infrastructure was caused by the street being used as a gravel pit over the last three plus summers for construction projects on adjacent streets and roads with constant heavy loaded truck and heavy equipment traffic in which I have already filed complaints with the municipal works dept over and asked that they repair the damage to no avail. I have attached pictures of the street damage. It is not acceptable to me that I as a tax paying home owner should be responsible to pay additional fees to the Town of Riverview for damages cause by construction of adjacent streets and lack of maintenance and repair to infrastructure i have owned my home since 2007 and have never seen any type of maintenance done only two or three emergency repairs. The street is not wide enough to accommodate vehicles meeting curbs would only hinder this more and is not needed on a street with two houses.

Sincerely  
Curtis Moase
