

Town of Riverview

COUNCIL REPORT FORM

Presented to: Mayor and Town Council

Presented by: Colin Smith, CAO

Date: September 12, 2022

Subject: Codiac Transpo – Year to date transit ridership levels

BACKGROUND

During the 2022 General Operating Budget approval process Council gave direction to return the transit system to pre-pandemic transit service hour levels starting in February 2022. Furthermore, Council gave direction to add service to the Patricia Drive area in response to a resident's request for transit service in that area. That additional travel time did impact the frequency of the entire West Riverview route by on average 5 to 6 minutes a trip.

Marcel Leblanc, the Town's IT Manager has been able to create a monthly tracking system with transit ridership data that is provided to the Town by Codiac Transpo. Therefore, with Marcel's assistance I will provide Council with a brief overview of transit ridership activity in Riverview so far this year. The tool that Marcel created allows for some interactive and real time assessment on how the overall transit system is operating in our community.

The attached one page overview provides Council a snapshot of the data overview that we will provide Council on transit services in Riverview so far in 2022.

CONSIDERATIONS

Legal: n/a

Financial: n/a

Policy: n/a

Strategic Plan: n/a

Interdepartmental Consultation: N/A

Communication Plan: codiac transpo would make riders and public aware. Town to support their communication efforts.

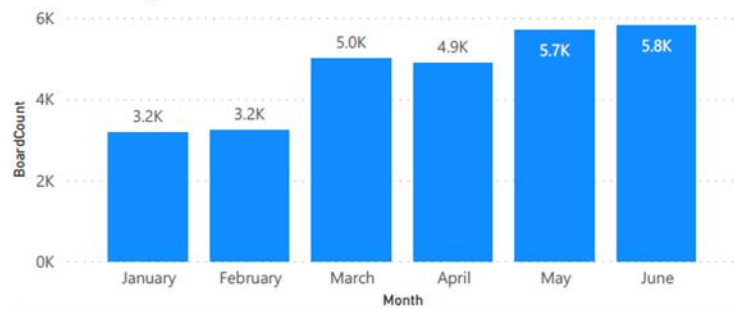

Recommendation of Staff

This presentation is for information purposes for Council at this time.
