Greater Moncton Welcoming Communities Research

Faculty of
Arts and Social Sciences

The project has two main research goals: 1. To identify and assess the services available to newcomers for integration into the community whether traditional community based, ethno-cultural associations, municipal based, or provincial based services that help create a welcome community. This is not focused on primary immigrant services but on community services. These services include but are not limited: places of faith, ethno-cultural associations, recreational, cultural and artistic programs and venues, service clubs, volunteer organizations, public libraries, community agencies; 2. To identify the existing gaps in service in the Greater Moncton immigration ecosystem for welcoming communities.
